Mosquito Control

Things you can do to reduce Mosquitoes around your home:

1. Keep your grass mowed short and mow before, not after, application.
2. Don't over water your lawn.
3. Keep hedges and other hiding places trimmed and open.
4. Empty and clean bird baths regularly.
5. Keep ornamental ponds clean and circulating.
6. Keeping wading pools and swimming pools clean – especially if you aren't using them.
7. Get rid of old tires, cans, bottles, or other containers that collect rain or irrigation water.
8. Empty plant saucers after a day or two.
9. Plant bromeliads in pots, not on the ground. Empty the water they collect regularly by inverting them.
10. Keep gutters and down spouts clean and free running.
11. Put screen over water collection barrels. Let water in, but keep mosquitoes out.
12. Water control is mosquito control.
13. Share this information with you neighbors – mosquitoes don't honor property lines.
